

Seminar:

Repeated adaptation across plant species

Speaker:

Gabriele Nocchi

11/03/2026 at 10:00

**Department of Biology
Aula seminari (A.O.20)
Via Madonna del Piano, 6
Sesto Fiorentino**

Gabriele is a bioinformatician and researcher in ecological and evolutionary genomics.

He uses genomic data to study evolutionary processes and tackle ecological and conservation challenges. He was most recently a postdoctoral researcher with Prof. Sam Yeaman at the University of Calgary (Canada) and earned his PhD from Queen Mary University of London and the Royal Botanic Gardens, Kew (UK) in 2022.
