Stakeholder analysis

by

Mohamed A. Abdrabo and Mahmoud A. Hassaan

CEDARE

1. Objectives:

- 1.1 This document intends to provide background information on stakeholder analysis in terms of definitions, objective, need for conducting stakeholder analysis.
- **1.2** Also, the document aims to provide a systematic approach for conducting a stakeholder analysis within the framework of Wadi Project.

2. Background

- 2.1 Public issues in general and environmental ones in particular, can affect and get affected by a wide range of groups, bodies and/or individuals. Accordingly, involvement of such groups, bodies and/or individuals may assist in making more informed decisions and increase their potential for success. Furthermore, as the number of such groups, bodies and/or individuals is usually very large, they cannot all be considered for inclusion in such consultation process. Accordingly, a selection process needs to be carried out to identify the most important interest groups to be incorporated in such consultation process. The main criteria employed to prioritize interest groups may include interests, attitude, power and/or influence of such groups which may vary considerably from one party to another.
- 1.2 It is worth mentioning that stakeholders refer to actors (persons or organizations) with a vested interest in the decision or policy being promoted.
- **1.3**. The main Objective of stakeholder analysis: is to identify the key people who have to be taken into consideration when making decisions or policy actions.
- **1.4** Stakeholder analysis allows policy and/or decision makers to:
 - Interact more effectively with key stakeholders;
 - Detect and act to prevent potential misunderstandings about and/or opposition to the policy or program; and
 - Increase support for a given policy or program.

3. Methodology:

The evaluation process will depend on certain criteria including stakeholders' attitude and influence which are largely determined by their interests and power, respectively.

The methodology adopted in stakeholder analysis, for prioritizing stakeholders and extent of their involvement, consists of four main steps:

- **3.1** Developing a checklist of all potential stakeholders
- 3.2 Identify each stakeholder's interest and attitude towards the issue in hand
- **3.3** Estimate the level of power and the degree of influence of each stakeholder
- **3.4** Evaluate the need, and degree, of involvement of each stakeholder.

Each of these steps is shown, in the same sequence as above, in one of the following tables.

2.1 Developing a checklist of all potential stakeholders

		Crite	eria o	of eva	alua	tion		Decisi	ons
Stakeholder	Interests	Attitude	I	Powe		Influence	Total	The need for involvement	Extent of involvement
	Titte ests Titte ac	H	F	P	minucinee	10001	The need for my oryement	Extent of Involvement	
Wri	te down th	ne names of a	all s	take	eho	lders			
			ı	I	ı				

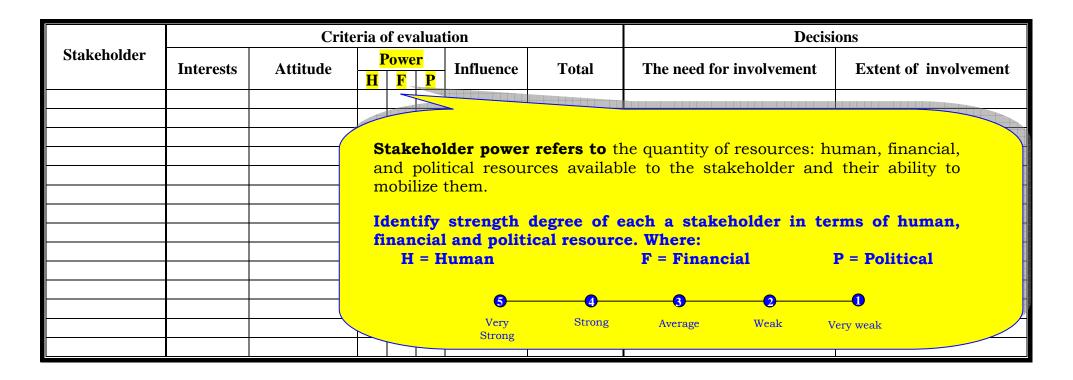

2.2 Identify each stakeholder's interest

		Crite	eria o	of eva	alua	tion		Decisi	ons				
Stakeholder	Interests	Attitude	I	Powe		Influence	Total	The need for involvement	Extent of involvement				
	Inter ests	Tittitude	H	F	P	imidence	10001	The need for my ory ement	Extent of involvement				
							I letter teleproper hand value letter letter letter letter letter letter value letter value letter value letter						
		Stakeholders interests refer to their motives and											
						ies being a							
		State the	e ma	ain '	thre	ee interest	s of each st	akeholder					
			T			1	l						

2.2 Identify each stakeholder's attitude towards the issue in hand

		Criteria	of evaluat	ion		Dec	cisions							
Stakeholder	Interests	Attitude F	Power H F P	Influence	Total	The need for involvement	Extent of involvement							
		Attitude refers to the potential reaction of various stakeholders to different decisions related to the issue in hand												
						ude from highly suppor	rtive							
		t	to strongl	y opposed	l Where:									
			3	2	1	-2	3							
			Highly Supportive	Moderately Supportive	Neutrai	Moderatery	ghly							

2.3 Estimate the level of power of each stakeholder

2.3 Estimate the degree of influence of each stakeholder

		Crite	eria o	of eva	alua	tion	Decisi	ons		
Stakeholder	Interests	Attitude		Powe		- <mark>Influence</mark>	Total	The need for involvement	Extent of involvement	
			H	F	P

	T	Interests Attitude Where if: Total < 10	Interests Attitude H Decide Where if: Total < 10 Stake			Decide the need for involving Where if: Total < 10 Stakeholder group could be a second or involving the second or invo	Interests Attitude Power Influence Total Decide the need for involving each stakely					

2.4 Evaluate the need, and degree, of involvement of each stakeholder (3/3)

		Crite	eria o	of eva	alua	tion	Decisi	ons						
Stakeholder	Interests	Attitude	Power H F P			Influence	Total	The need for involvement	Extent of involvement					
I	Identify the extent of stakeholder involvement													
	For this analysis, stakeholders should be divided into three groups:													
	• Group 1: those who have highly positive or negative attitudes and high power (would be involved in													
	decision making)													
		Ο,	e m	odei	ate	ly positive	or negative	attitudes and medium pow	er (would be					
	consulted)					<i>J</i> 1	Ü	•	`					
• (Group 3: t	hose who ha	ave	mod	lera	tely positi	ve or negati	ive attitudes and low pow	er (would be					
	informed).					<i>J</i> 1	S	•	`					
W	here if:													
Тс	otal 10 - 20	S	take	ehol	der	group wou	ld be inform	ed only						
						_								
	Total 20 -30 Stakeholders group would be consulted Total > 30 Stakeholders group would be involved in decision making													

Stakeholder Analysis

	Criteria	of evaluatio	n					Decisi	Decisions		
Stakeholder	Interests	Attitude	Power			Influence	Total	The need for	Extent of		
	Interests	Hittiac	Н	F	P	imiuciec	Total	involvement	involvement		

		S	Scale		
Attitude	3 Highly supportive	2 Moderately supportive	1 Neutral	-2 Moderately no	egative -3 Highly negative
	H 5 Very strong	4 Strong	3 Average	2 Weak	1 Very weak
Power	F 5 Very strong	4 Strong	3 Average	2 Weak	1 Very weak
	P 5 Very strong	4 Strong	3 Average	2 Weak	1 Very weak
The need	for involvement (If total)	> 10 Should be involved	< 10 Could b	oe disregarded	
The exten	t of involvement (If total)	< 20 To be informed	20-30 To be c	onsulted	> 30 In decision making process

These above-mentioned threshold limits are guidelines and could be slightly modified.
